EDUCATION

Bachelor of Computing, Computer Science (Co-op) | Business Minor Sep 2022 – Apr 2027
University of Guelph, Guelph, ON 3.7 GPA (4.0 scale)
College of Engineering & Physical Sciences Dean's Honours List (F22,W23,F23,W24) (80%+ average)
Relevant Coursework: Mobile Computing, Object-Oriented Programming, Data Structures, Algorithms

TECHNICAL SKILLS

Programming Languages: Python, C/C++, Go, JavaScript, R, SQL, TypeScript
Frameworks: React, GraphQL, Node.js, Flask, Flutter
Task Management: Git, Docker, Google Cloud Platform, VS Code, Amazon Web Services

EXPERIENCE

Yíká (via Riipen Level UP) May 2025 – Jun 2025
Front-End Developer | Remote Internship (8 weeks)

- Built the Shopping Experience page using **Next.js**, **TypeScript**, and **Tailwind CSS**, implementing filter logic for gender, brand, style, and color with responsive layout.
- Fixed UI using **Chrome DevTools**, improving filter accuracy and user interaction.

Bell May 2024 - Dec 2024
Backend Developer Co-op (8 months)

- Developed **Go-based** backend features for the Cornerstone Refinement team and assisted with **database migration**. Tested features using **Postman** and tracked progress in **Jira**.
- Employed **Agile development** frameworks to manage and streamline project workflows, ensuring timely and efficient completion of tasks.
- Collaborated with another intern on a side project to compare two databases, monitor discrepancies, and **automate** email notifications. Implemented a back-end goroutine to read **SQL queries** and a **REST API** to pass data to the GUI, enhancing data accuracy and operational efficiency.

PROJECTS

Portfolio Website | Next.js, TypeScript, JavaScript, Tailwind CSS, MongoDB  Aug 2025
Created a **dynamic** portfolio website showcasing my personal growth as a software developer. Integrated a contact page using the **Next.js** framework with **MongoDB** for communication and data management.

JetSetGo | Flutter, Xcode, Dart, Firebase Auth, Firestore, Firebase Storage, Gemini API  Apr 2025
Developed **JetSetGo**, a mobile app that simplifies travel planning by organizing itineraries, packing lists, and essential documents in one platform. Built with **Flutter** and integrated **Firebase** for auth, storage, and data handling, along with **Gemini API** and **OpenWeather API** for AI-driven suggestions and live weather forecasts.

Full-Stack Pool Game | C, Python, SQLite, HTML  Apr 2024
Developed an interactive pool game combining a physics engine in **C** with a **Python** backend, **SQLite** database integration, and a simple **HTML** interface to simulate realistic gameplay and score tracking.

EXTRACURRICULARS

Guelph Women In Computer Science | GWICS Sep 2022 – Present
Served as **Vice President**, overseeing a **\$5K** budget and growing membership to **40+** students.
Organized the **"Go CODE Girl"** event to promote coding for Grades 7-12 girls. Designed and adapted the curriculum for younger students, creating an engaging learning experience.
